Fish health > Sea lice control and treatment
8
Fish health > Other diseases - General
2
Fish health > Sea lice epidemiology
2
Fish health > General fish health
1
Fish health > Non-infectious disease and disorders
1
Fish health > Other diseases - Epidemiology
1
Fish health > Other diseases - Prevention and treatment
1
Fish health > Sea lice impacts
1
Production
Feed and nutrition > Alternative feed ingredients
3
Feed and nutrition > Feed additives and supplements
2
Fish performance and biology > Physiology, metabolism and biological responses
4
Fish welfare > Welfare assessment
1
Production systems and technology > Integrated multi-trophic aquaculture
1
Wild populations and ecosystems > Parasite and pathogen transmission
3
Wild populations and ecosystems > Biodiversity and ecosystem effects
1
Resource use and footprint > Energy, greenhouse gases and life-cycle footprint
2
Resource use and footprint > Marine-resource use
1
Environment
Environmental management > Monitoring and assessment
2
Waste and emissions > Chemicals and therapeutants
2
Escapes > Escape occurrence and causes
1
Methodological research > Diagnostic and laboratory methods
1
Methodological research > Monitoring and sampling methods
1
Methodological research > Statistical and modelling methods
1
Methods
Food safety > Microbial food safety
2
Human nutrition and health > Nutritional benefits and risks
1
Product
Governance and policy > Licensing and spatial governance
1
Markets, trade and value chains > Value chains and supply chains
1
Industry and governance
Public health > Antimicrobial resistance and One Health
1
People and society
